6: Mobile Disk:

First use of the machine is equipped with USB extension cable, connect the USB port of the machine, the other end to connect to your computer USB interface, the computer will pop up mobile disk, you can also be found in the "my computer" drive "removable disk". When the machine is connected to the computer, the machine as mobile disk of computer has already started to work, you can be very convenient with computer view, transmit, copy, delete files. The native image file record for: * disc \ _DCIM \ 100 dscim. Need to uninstall this machine, please click on the lower right corner of the taskbar icon, mobile equipment inside uninstall the removable storage devices, to confirm safe to pull out after the hardware system, and then disconnect the machine connected to the computer.

Note: according to the different computer configuration or system, identify the removable disk will be slightly different, please be patient, this time it is best not to the operation of the camera, lest affect computer identification of hardware, if long time not to recognize mobile disk, please try to insert, if still can't identify the hardware, please make sure your operating system, drivers, USB interface, connecting line is normal; In order to avoid damage to the machine or computer, in strict accordance with the specification, please to connect, unloading the machine, the connection must use first included USB extension cord to connect the USB port of the machine, and connected to the USB port on the computer, uninstall, when prompted to "can be safely removed from the system equipment, switch off the computer USB, then disconnect USB, which is connected with the machine.

Three: Related Parameters

| Project | related parameters |
|------------------|--|
| Video format | AVI |
| Video coding | H.264 |
| Video resolution | 1920*1080P |
| Video frame rate | 30fps/15fps |
| Player software | operating system or bring the mainstream video player software |
| Image format | JPG 4032*3024 |
| Image | 5M pix |
| Image ratio | 4:3 |
| Support system | Windows me/2000 xp 2003/vista:M |
| Battery capacity | 800mAh |
| Working time | About 4H |
| Charging voltage | DC-5V |
| interface type | MINI 5pin USB |
| Storage support | micro SD card, |
| Battery Type | High capacity polymer lithium battery |

Project related parameters

AVI video format

Video coding h. 264

Video resolution is 1920 * 1080 p

Video frame rate of 30 FPS / 15 FPS

Player software operating system or bring the mainstream video player software

Image format JPG 4032 x 3024

Image 5 m pix

Image ratio 4:3

Support system Windows 2003 / me / 2000 xp vista: M

Battery capacity is 800 mah

Working time is about 4 h

Charging voltage DC 5 v

The MINI 5 pin USB interface type

Storage support micro SD card,

Type high capacity polymer lithium battery

Specifications may change, upgrade, update, please in kind prevail

Four: Fault Diagnosis

| Fault phenomenon | Possible reasons | Solution |
|---|---|--------------------------|
| Can not working | Batteries no electricity | Charging |
| | Machine crash switch machine | restart |
| Automatic shutdown | Batteries no electricity | Charging |
| Connect the computer does not recognize the USB | Connect the computer shutdown condition | Boot to connect again |
| | USB cable fault | replace the USB cable |
| | The motherboard does not support USB device | update driver |
| | PC Bios Settings screen USB port | activate the USB port |
| Data can't save memory | computer crash | restart the computer |
| Boot immediately after shutdown | Memory full | delete unnecessary files |
| | Battery Low | charging |
| Video background noise | Memory full | delete unnecessary files |
| | No card | With card |
| | battery Low | charging |

Five: Matters Needing Attention

Usage scenarios: please strictly abide by the relevant national laws, this product may not be used for any illegal purpose, otherwise the consequence is proud.

About the battery: as the growth of the use of time, battery working time is shortened, unused for a long time, please charge before use.

Actual capacity slightly smaller than nominal capacity by a player, is a normal phenomenon.

File security: non-professional storage devices, this product does not guarantee that the integrity and security of the internal storage file, please immediately on the computer or other storage device backup your important files.

Video quality: this product professional video equipment, does not guarantee that the effect of the video file can meet your expectations.

Working temperature: 0 to 40 °C

Working humidity: 20% to 80%, do not put product in damp working environment, products do not have waterproof function.

Shooting illumination: please use under the environment of the light is enough, please don't please camera directly to the strong light sources such as solar, lest damage optical device.

Cleaning requirements: do not use under the environment of the dust density is too large, so as to avoid the lens and other components from dust, effect the camera, the lens can be used to clean lens paper or glasses cloth to wipe gently, clean.

Other items: this product belongs to precision electronic products, please do not make its strong shock, vibration, do not in strong magnetic field, heavy current field use.

Waste treatment: please pay attention to environmental protection, do not throw this product. Forbid throwing this product in the fire, so as to avoid explosion.

Added: other unknown matters, please contact the local dealer.
